

Refinery Evaluation Model

Assess the **competitiveness** of refineries around the world and **benchmark** their performance

700+
detailed refinery profiles

Benchmarking on
140+ metrics

Global transaction
deal metrics from
2000

Historical &
Forecast net
cash margin
model for **500+**
refineries

Global refinery
investments including
project status, costs &
expected completion dates

Coverage of over
90% of refining capacity
in each region

Use it to:

Assess key elements
influencing current &
mid-cycle margins

Benchmark refineries
on over 140 metrics to
assess competitive
advantage

Analyse refinery
transactions, from
asset sale details to
valuation

Evaluate global
investment plans and
their impact on
competitive position

Understand the effect
of changes to refinery
configuration or crude
slate on earnings
performance

Understand themes
and trends impacting
refining economics
